## RA34 Preparation Test Methods

Scope: To develop test methods for (1) measuring the effect of preparation (defined as all wet steps prior to dyeing, printing or finishing of white textile fibers, yarns or fabrics) upon the chemical, physical and colorfastness properties of these textiles; (2) evaluating the effectiveness of preparation chemicals; and (3) controlling preparation processes including methods for obtaining information about materials on the textiles to be prepared. Test Methods 78, 81, 82, 97, 98, 101, 102, 144.

## RA59 Fibrous Test Materials

*Scope:* To prepare detailed specifications for AATCC standard test fibers, yarns and fabrics other than colorfastness fading standards; specifications to be developed with the assistance and concurrence of those test method development committees responsible for the test methods in which the standard fibers, yarns or fabrics are used. EP10.

<i>Chair</i>	<i>Secretary</i>

## RA88 Home Laundering Technology

*Scope:* To encourage and promote discussions on current developments and problems associated with the use of standard and new chemical materials, including soaps and detergents, bleaches, water and fabric softeners, enzymes and any other auxiliaries available to the consumer for use in home laundering and coin-operated machines, which may affect color, performance and special functional finishes and the ecology. The information gathered by this committee will be directed to the attention of specific AATCC research committees for their use and orientation. Where appropriate, this committee will plan technical programs and will serve as a clearinghouse for the dissemination of information on this subject area.
