Dear current and future Pacific Section AATCC member,

It has been quite some time since you have heard from your local AATCC and we are now officially getting out of hibernation. We are planning to have a Pacific Section Meeting within the next few weeks. We aim to reflect the many changes of the local industry and will include the fashion and design industry in our upcoming events. Sustainability in the textile supply chain will be a key topic among others. We will inform you on a regular basis about our upcoming events in form of this new Pacific Section Newsletter per e-mail.

We are taking on the challenge to get the local Design/Fashion Industry and the Textile Manufacturing Industry interested in upcoming AATCC events which benefit everyone in the Pacific Section.

AATCC is Your Professional Association

Founded as the American Association of Textile Chemists and Colorists (AATCC), the Association continues to evolve to meet the needs of those in the ever-changing textile, materials and design industries. AATCC has served textile professionals since 1921. Today, the Association provides test method development, quality control materials, education and professional networking for a global audience.

- Networking Opportunities
- Professional Development thru Webinars and Online Courses
- Award-winning Print and Online publications
- Educational Symposia, Conferences and Workshops
- Quality Control Expertise, Information and Materials
