BUILD THE FUTURE OF TEXTILES SCIENCES—DONATE!

AATCC Foundation, Inc. is building the future, and you can help!

One very easy way to donate is **online**; when renewing your yearly Association membership, you can make an online contribution that goes to AATCC Foundation.

You can also give **outright gifts** in the form of cash, appreciated securities, or other property. By making an outright gift, you may enjoy the advantage of receiving an income tax deduction for the full fair market value of the gift. The Association also matches a portion of these contributions annually.

Corporate and foundation philanthropic gifts giving options are also available. For additional information, see our website at www.aatcc.org/foundation/donate.

WHY DONATE

- Leave a lasting legacy that will always be remembered.
- Invest in the future of textiles through scientific research.
- Honor or thank someone who has made a difference in your life.
- Make a difference in the lives of textile science and design student scholars; their studies will affect the future of textile and related sciences globally.
- Move textile and related sciences forward.
- Ensure that current and future textile, fiber and softgoods professionals have the resources to learn, grow and give back.
- Honor your profession with a gift.

AATCC FOUNDATION, INC.

The American Association of Textile Chemists and Colorists (AATCC) founded AATCC Foundation, Inc. on May 8, 1997. The Foundation, with its own board of directors, operates independently and in the furtherance of the charitable mission of the Association.

The Foundation operates at The AATCC Technical Center located in Research Triangle Park, North Carolina, USA. Because the influence and activities of the Association extend far beyond the borders of North America, the Foundation accepts funds from around the world. The board of directors is comprised of textile, retail, and chemical industry experts, as well as other senior business leaders with interests in many different aspects of textile science, design, materials, processing, and testing.
