

Table of Contents

- 1 Environmental Evaluation of Fabric Dyeing and Water Use for a Global Apparel Manufacturer**
By Tasha L. Lewis, Xia Zeng, Vanessa Sanchez, and Jintu Fan, Cornell University
- Key Terms**
Colorfastness, Chemical Oxygen Demand, COD, Effluent Quality, Sustainability, Waterless Dyeing
- DOI:** 10.14504/ajr.4.1.1
- 14 Evaluation of Antimicrobial-Treated Fabric Properties**
By Nina M. Lamba, CCL Biomedical Inc., Diane S. Herson, University of Delaware, Rahim Jindani, North Carolina State University, and Martin W. King, North Carolina State University and Donghua University
- Key Terms**
Antimicrobial, Biocidal, Rapid Screening Test, Test Methodology, Textile Finish Assessment
- DOI:** 10.14504/ajr4.1.2
- 22 Inkjet Printing of Linen Fabrics Pretreated with Atmospheric Plasma and Various Print Pastes**
By Arif Taner Özgüney, Ebru Bozacı, Aslı Demir, and Esen Özdoğan, Ege University
- Key Terms**
Atmospheric Plasma, Colorfastness, Inkjet Printing, Linen, Pretreatment Print Paste
- DOI:** 10.14504/ajr.4.1.3
- 28 Seam Properties and Sewability of Crease Resistant Shirt Fabrics**
By Alime Aslı İllez, Eylene Sema Dalbaşı, and Gonca Özçelik Kayseri, Ege University
- Key Terms**
Cotton Shirt Fabric, Creases Resistance, Seams, Sewability, Wet Processing
- DOI:** 10.14504/ajr.4.1.4
