

Review . . .

[Continued from page 45]

mability standards and codes written by an impartial organization, such as the ISO, and these standards should override any regional or national regulations. Politically this may not

be a feasible thing to accomplish, however, in the area of flammability, we should all start using the same yardstick when measuring combustibility of consumer products.

Quality & Consistency

Grant Industries Incorporated is a Progressive Chemical Specialty House marketing a complete line of textile chemicals. Our comprehensive line includes carriers, scours, softeners, leveling agents and many more. Our professional sales and technical staff are available to formulate chemicals to meet your demands.

GRANT'S
years of experience offers **quality and consistency.**

for more information please call us at (201) 791-6700.
