Serving the textile industry for 45 years with speed, consistency and reliability.

Line CHEMICAL CORPORATION

CHEMICAL MANUFACTURERS
7 BLACKWELL ST., ROCK HILL, SC 29730 • TEL. (803) 327-7535 • FAX (803) 327-3354
295 GOVERNOR ST., PATERNOM, NJ 07501 • TEL. (201) 684-2808 • FAX (201) 684-4212

Circle 25 on Reader Service Card  American Dyestuff Reporter • January 1993
Between Dipole Moment, Light And Sublimation Fastness Sept./56
Modifying The Dyeability of Wool Oct./15
Effect Of Amphoterics On Low Temperature Dyeing Of Polyamide Fibers Oct./28
Cyclic Alkanolamines For Improved Dyeability Of Crosslinked Cellulose Nov./173
New Approach To Modified Cotton For Improved Dyeability With Reactive Dyes Nov./180
Influence Of Direct Dye Structure On Coverage Of Immature Cotton Fiber Neps Nov./187
Modification Of Fabric Dyeability By Partial Hydrolysis Of Methylolamide Finishes Dec./37
Heterocyclic Dye Synthesis: Synthesis And Dyeing Performance Of New Polyfunctional Pyridine Azodyes Dec./43
Influence Of Direct Dye Structure On Coverage Of Immature Cotton Fiber Neps Dec./48
Improved Processing Of Knitted And Permeable Woven Fabrics In Finishing Operations Oct./22
Alkaline Hydrolysis Of Polyethylene-terephthalate Fabric In The Presence Of Organic Solvents Oct./32
Flame Retardants Annual Flame Retardants Buyers’ Guide — 1992 Jan./17
Historical Record A History Of The International Dyestuff Industry Nov./59
Dyes Of The Ancients Nov./109
Sir William Henry Perkin Nov./117
Reflections On A Half-Century In The Dye Industry Nov./131
International Market Report On Dyestuff Production, Sales, And Consumption Nov./141
Rensselaer: Cradle Of The American Dyestuff Industry Nov./159
Woodrow Wilson Address To Congress Nov./167
First Issue Cover Reproduction—The American Dyestuff Reporter Nov./169
On Color Making Developments In France—Reproduced From Early ADR Issue Nov./17
On Dyestuff Irregularities—Reproduced From Early ADR Issue Nov./172
Light Effects Effects Of Light And Pool Water On Selected Swimwear Fabrics Jul./34
Monitoring Tests Automatic Density Monitoring Improves Production Yields Aug./30
Preparation Optimization Of Pretreatment Parameters Of Three Fiber Types Oct./17
Printing Developing A Thicker To Replace Sodium Alginate In Printing Reactive Dyes Feb./34
Development Of A New Thinner In Printing Disperse Dyes On Polyester May/55
Transfer Printing Cotton And Polyester Fabrics Containing Crosslinked Polyester Polyurethanes Jul./26
Development Of A Thicker To Substitute Kerosene/Water Emulsion In Pigment Printing Aug./32
Upgrading Processing Procedures In Textile Printing Applications Sept./48
Fixation Of Reactive Prints On Silk Sept./50
Training Programs Innovation And Training: Keys To Success At Permna Color May/28
Wastewater Studies Using Electrochemical Technology To Treat Textile Wastewater: Three Case Studies Aug./15
Minimizing Waste Through Responsible Container Management Techniques Aug./24
