ARTICLES

AATCC Conference Preview: New Orleans-Bound ........................... Sept 68
ADR' ATME Report — Part I ....................................................... Jan. 58
ATME Report — Part II ..................................................... Feb. 59
Accelerated Laundering Method for Flame-retardant Fabrics
(McSherry, et al.) ................................................................. July 52
Aerobic Treatment of Textile Wastes (Purvis) Aug. 19
Agent Migration in DP Finishing of Knit Cotton Tubes
(Andrews, et al.) ................................................................. July 40
Ammonia Reactor for Continuous Production of Fire Retardant
Cottons (Parkins, et al.) .................................................... May 30
Apparel Seam Test: Comparison of Seam and Fabric Tested on
Children's Sleepwear (Jakes, et al.) Nov. 58
Application of Durable Flame Retardants to Cotton Carpets
(Beninate, et al.) ................................................................. June 26
Assessing the Hazard from BCME in Formaldehyde-containing
Acrylics Emulsions (Hurwitz) ........................................... Mar. 62
At Marion Dyers Computer Automation Is a Reality
(Camp and Ford) ............................................................... Nov. 26
Automated Dyeing Improves Uniformity ................................ Nov. 21
Big Reis, Big Savings ............................................................ Oct. 36
Carpet infeed Guiding for Rotary Screen Printers (Mattke) June 24
Carpet Picture: Feast and Famine (Lynn) June 23
Case for Automated Dyeing, The (Batchelor) Nov. 23
Chemical Finishing of Knits (Kasimir) Apr. 27
Chlorination: An Effective Dye Waste Treatment (Moyer) Mar. 65
Coloration of Textiles: Woven Patterning vs. Printing
(Noble) ........................................................................... Feb. 38
Com Text Barge Clientele ..................................................... Apr. 41
Combating Snagging and Bagging (Leavitt) Sept. 31
Computer Control of Package Dyeing (Watters) Mar. 52
Consumer Protection: Fact or Myth? (Blagman) Mar. 56
Continuous Dyeing with Solvents (Capponi, et al.) Jan. 36
Continuous Solvent Scour Pays Off for a Knitter (Kolb) Oct. 35
Control System Treats Dye Plant Waste
(horning) ........................................................................ Aug. 32
Cooperation Aids Schools, Textiles (Howry) Oct. 47
Crawford Spectrometric Process, The (Crawford) Feb. 62
Curing 'Carrier Spots' (Kirjanov) ........................................ Sept. 24
DIA. Tool for Selecting HT Dyes (Nishida, et al.) .................... July 32
Decolorizing Dye Wastes (Kennedy, et al.) Aug. 11
Developing High Style 'Looks' (Loughlin) Mar. 25
Development of Dyestuffs for Transfer Printing Paper
(Vellins) ........................................................................ Oct. 54
Determination of the T0D of Waste Water from Warp Size
Formulations (Blanchard, et al.) .......................................... June 62
Dye Auxiliary Choices Are Critical for Knits (Nahta) Sept. 27
Dye Ecological Group Outlines Objectives Sept. 78
Dyeing and Finishing Arnel Triacetate/Polyester Blends
(Holmes) ....................................................................... May 17

Editorial Index: 1973 ............................................................. Feb. 48

Effect on Wool Dyeing of Internally Deposited Acrylics
Polymerized by THPC-PS Catalyst ................................ Apr. 42
Effluent Guidelines Issued .................................................. Aug. 26
Energy Crunch: Mother of Invention (Sapers) Sept. 28
Flame-retardant Acetate Fabrics: DOC FF 3-71 Data on Unwashed Versus
50-Wash Flammability (Bauer) ........................................ Dec. 66
Flame Retardants: Textile Men, Government Moving Closer To-
gether .............................................................. Apr. 74
For Wet Processors: What to See at ITEX-74 ...................... Oct. 22
Government Financing Spurs Cotton/PE FR Research ....... Sept. 64
Heat Transfer Paper Products Produced by Rotary Printing
Machines (Jacobs) ............................................................. July 24
High Temperature Steam Aging Helps Union Textile
Compete ........................................................................ Sept. 86
How a Textile Company Can Survive (Anderer) June 52
How Laundering Affects Flame Retardant Fabrics
(Joseph and Bogle) ................................................................ May 39
How to Apply THPOH Fire Retardant (Quinn) May 24
How to Dye Flame Resistant Polyester (Mehta, et al.) June 48
How to Equip a Modern Dye House (Squire) Mar. 21
How to Minimize Cyclic Trimer When Pressure Dyeing Polyester
Yarn (Baker) .............................................................. Apr. 34
How to Prepare, Dye and Finish Textured Polyester Woven Fabrics
(Forrester, et al.) ............................................................... Oct. 37
How to Print Transfer Paper: Analysis by a Gravure Printer
(Mahe) ........................................................................ July 30
How to Recover Heat from Your Oven Exhausts (Beltran) Apr. 66
Hydro-extracting and Padding: A New Concept (Rudnick) Aug. 49
INTEX-74 Preview ................................................................. Oct. 21
Immiscible Knit Dyeing System, An (McNally) Apr. 30
Industry, Schools Tell Textiles' Story (Adams) Oct. 51
Inside Red China's Dyestuffs Industry ................................ Mar. 50
Instrumental Analysis of Textile Air Pollutants (Zeller) Aug. 29
Insuring Receivables Protects Wet Processors
(Dillworth) .............................................................. June 56
Liquidified Natural Gum Improves Dyeing and Printing of Fabric
(Rossiter) ............................................................. Sept. 30
Low Cost Automation for Batch Dyeing (Winhey) Nov. 30
Measuring Cotton Maturity by Reflectance of Dye Cotton Staple
(Wyatt) ........................................................................ Sept. 92
Most Grads Ready to Follow the Job .................................... Nov. 42
New Aspects of Solvent Scouring and Finishing (Kurz) ......... Jan. 25
New Finishes and Fibers Impart Fire Retardance ................. July 47
New Flame Retardant Finish for Cotton (Tesorio and Olds) June 35
New Mineral Dyeings for Cotton Textiles (Conner) Mar. 37
New Range Improves Knit Goods’ Scouring ......................... Oct. 34
New Textile Supplier: American Color & Chemical
(Brower) ............................................................. June 26
Note on Advantages Due to BBL-Treatment in Service
Wear Trials on Non-resin Treated and Resin-treated
Fabrics, A (Sarma and Chpalkati) ................................ Apr. 56
Nonwovens: Peaceful Coexistence with Textiles ................. July 51
Nutmeg Happy with Computerized Feed System ................. Mar. 54
Oxidation of Sulphur Dyeings (Sternberger) ......................... Sept. 88
Ozone Destruction of Selected Dyes in Wastewater
(Snider and Porter) ............................................................ Aug. 36
Pad Dyeing Machine Handles Circular Knits in Tubular Form
(Pressley) ................................................................. Oct. 31
Peat: New Medium for Treating Dye House Effluent
(Leslie) ............................................................... Aug. 15
Polyester Boom Prompts Disperse Dye Expansion ......... July 49
Polyester Reduction Clearing Simplified
(Rossiter and Christie) ..................................................... July 45
Predict "Moderate" Growth in 74 ........................................ Apr. 65
Preliminary Report on the ASTM Round Robin for the Semi-
restrained Flammability Test (Anderson and Grasso) Nov. 60
Projected Growth of Manmade Fibers (Head) ....................... Sept. 74
