

# Table of Contents

- 1 Polyacrylamide-Modified Polyester Fabric with Easy-Cleaning for Efficient Oil/Water Separation**  
By Mengyuan Sun, Sufang Zhao, Wei Wei, Jindan Wu, and Jiping Wang, Zhejiang Sci-Tech University  
**Key Terms**  
Oil/Water Separation, Polyacrylamide Hydrogel, Polyester, Superhydrophilicity, Superoleophobicity  
**DOI:** 10.14504/ajr.5.1.1
  
- 7 Evaluation of Karl Fischer Titration Vial Closure Integrity for Extended Storage of Cotton Test Specimens**  
By Joseph Montalvo, Terri Von Hoven, and Michael Santiago Cintron, USDA-ARS-SRRC  
**Key Terms**  
Air Transport, Aluminum-Crimp Cap, Cotton Samples, Extended Storage, Ground Transport, Karl Fischer Titration, Original Water Content, Vial Closure Integrity  
**DOI:** 10.14504/ajr.5.1.2
  
- 21 Determination of Saturation versus Centrifugal Dewatering for a Multilayer Porous Cotton Textile**  
By Fatih Kasap, Arçelik and Mustafa Ozdemir, Istanbul Technical University  
**Key Terms**  
Capillary Number, Irreducible Saturation, Spin Drying, Remaining Water Content  
**DOI:** 10.14504/ajr.5.1.3
  
- 29 Development and Characterization of Naproxen-Loaded Poly(vinyl alcohol) Nanofibers Crosslinked with Polycarboxylic Acids**  
By Çiğdem Akduman, Pamukkale University, and E. Perrin Akçakoca Kumbasar and Işık Özgüney, Ege University  
**Key Terms**  
Crosslinking, Drug Release, Electrospinning, Naproxen, PVA, Polycarboxylic Acids  
**DOI:** 10.14504/ajr.5.1.4
