**INDEX BY SUBJECT**

FOR your convenience there appears below a list of page numbers in the respective issues for 1946. Those in the first columns indicate the beginning of the general pages and those in the second columns indicate which pages appeared in the Proceedings of the Association of the American Association of Textile Chemists and Colorists.

The presence of the letter “PW” before the page number, any where in the two columns, indicates that the article appeared in the Proceedings of the Association.

**ABSTRACTS FROM CONTEMPORARY JOURNALS**

- A New Method of Approach to the Bleaching and Subsequent Dyeing of Jute
- A Theoretical Discussion of Further Substitution in Disubstituted Methylene-derivatives—Part IV
- The Cotton—Dyestuff Complex—Part II
- Accident Prevention in the Dyeing, and Finishing Industry
- A Theoretical Discussion of Further Substitution in Disubstituted Methylene-derivatives—Part IV
- The Cotton—Dyestuff Complex—Part II
- The Use of Polymers to Make Wool Unshrinkable
- X-Ray Studies of the Structure of Plastics
- Decreasing the Acid Degradation of Cotton Sewing Thread
- Dyeing Jute in Warp Form
- Frictional Properties of Wool Fibers
- Use of Cyanamide for Increasing the Fastness of Colorings on
- Some Uses of Calcium Alginate Rayon
- Some Experiments on the Dyeing of Nylon Yarn
- New Method of Vat Dyeing Yarn Packages
- Chemical Industry, The Growth of an American Aromatic
