AMERICAN DYESTUFF REPORTER

INDEX
TO VOLUME XXII

January 1, 1933 to December 31, 1933 Inclusive

Indexed by Subject and Author
Index by Subject

For the convenience of our readers there is appended below a list of pages in the respective issues of the American Dyestuff Reporter for the year 1933. The numbers in the first column indicate the regular volumes from which the second, the numbers of the pages of the Proceedings of the American Association of Textile Chemists and Colorists.

January 2........... 1 to 34 1 to 20
January 16........ 35 to 72 21 to 48
January 30........ 73 to 108 49 to 76
February 13....... 109 to 142 77 to 100
February 27....... 143 to 168 101 to 116
March 13........... 169 to 200 117 to 136
March 27........... 201 to 236 137 to 156
April 10........... 237 to 262 157 to 172
April 24........... 263 to 296 173 to 192
May 3.............. 297 to 322 193 to 200
May 17............. 323 to 358 201 to 208
June 5............ 359 to 384 209 to 230
June 19........... 385 to 406 231 to 232
July 3............. 407 to 436 233 to 244
July 17........... 437 to 462 245 to 252
July 31........... 463 to 484 253 to 264
August 14......... 485 to 511 265 to 272
August 28........ 512 to 540 273 to 284
September 11.... 541 to 560 285 to 288
September 25.... 561 to 591 299 to 304
October 9......... 592 to 622 305 to 328
October 23....... 623 to 650 329 to 340
November 6...... 651 to 684 341 to 356
November 20..... 685 to 720 357 to 368
December 4...... 721 to 746 369 to 380
December 18.... 747 to 780 381 to 388

Absorption and Affinity at Different Temperatures of substantive Dye-stuffs when Applied to Cotton and Rayon, Rate of (Seibert)........ 757
Acrylic Fibers with particular Reference to Dyed Goods, Determination of (Trotman and Gee)................................. 303
Affinity at Different Temperatures of Substantive Dye-stuffs when Applied to Cotton. Determination of and (Soldier)........... 757
Aging Test for Waterproofed Ducks and Similar Fabrics, An accelerating (Lenher).......................................................... 13
Aging Vat Prints (Briggs)............................................................................... 114
Alcohol Products, Sulfonated (Lenher)........................................................ 13
Alcohol Solutions, Recent Developments in the Application of Fat (Lenher)................................................................. 663
Analysis of Dye Mixtures by the Use of Immiscible Solvents (Matherson).............................................................................. 21
Analysis to Dyeing, The Application of Spectrophotometric Color (Pine)............................................................................. 470
Antichloring Cellulose Fibres, Kier Bolling, Peroxide and Sodium Hypochlorite Bleaching, and (Alling) (Lambert).............. 544
Antichloring Cellulose Fibres, Kier Bolling, Peroxide and Sodium Hypochlorite Bleaching, and (Alling).......................... 544
Antichloring Cellulose Fibres, Kier Bolling, Peroxide and Sodium Hypochlorite Bleaching, and (Alling).......................... 544
Antichloring Cellulose Fibres, Kier Bolling, Peroxide and Sodium Hypochlorite (Alling)...................................................... 544
Bleaching Process with the usual Western Methods, Comparison of a Modern U.S.S.R. Kiering and (Hall)..................... 592
Bleaching Solution, The Hydrogen Ion Concentration of Hypochlorite (Chapin)................................................................. 559
Boilers and Textile Plants, The Treatment of Water for use in (Backwell)............................................................................... 519
Bolder Water Conditioning, Aspects of (Morrison)............................................. 519
Cotton in Silk Sockings, The Effect of Salt on (Hart).......................................... 301
Cotton in Silk Sockings, The Effect of Salt on (Hart).......................................... 301
Cotton in Silk Sockings, The Effect of Salt on (Hart).......................................... 301
Cartel in World Trade, The European Dye (Concannon)...................... 73
Cellulose Fibres, Kier Bolling, Peroxide and Sodium Hypochlorite Bleaching, and Antichloring (Alling).......................... 544
Cellulose Fibres, Sanding, Sizing, Wetting and Steeping (Alling).......................................................... 485
Cellulose Fibres, Recent Developments Relating to Surface Properties of (Smith).............................................................. 515
Cellulose, Modern Ideas Concerning the Direct Dyes and (Neale and Griffiths).................................................................. 651
Cellulose, Modern Ideas on the Structure of (Sklince)................................. 267
Chemical Constitution, Recent Advances in the Physical Chemistry of (Smith)............................................................... 515
Chrom irurn Plating in Calico Printing, The Utility of (Diele)............. 105
Colors in Systems of Reflecting (Hetzer)..................................................... 253
Colorist and Cooperation, The (First)........................................................ 173
Colors in Reduced State, The Influence of Direct sunlight on (Weber)........ 137
Colors on Cotton, Recent Developments in the Application of Fast (Wells).......................................................................... 574
Color Production, The Development of Stabilized Azo Dyes in Fast (Mann)........................................................................ 559
Color Shrink Problem, Predicting, Some (Easley)........................................ 128
Colors, Some Observations on the Quantitative Description of the Dyestuff Properties of Direct Cotton (Neale)........................ 344
Communication........................................................................................... 66
Copper in Textiles, A Comparison of Methods for the Determination of Small Amounts of (Scott)................................. 605
Costs a Necessity, Simplified Methods to Correct Plant Inefficiency. (Normal)........................................................................... 6
Cotton and Rayon, Rate of Absorption and Affinity at Different Temperatures of Substantive Dye-stuffs when Applied to (Seibert)........ 757
Cotton Colors, Some Observations on the Quantitative Description of the Dyeing Properties of (Neale).................................................. 344
Cotton Fabrics, The Detection of Heavy Metals and Traces of Impurities in (Chase)................................................................. 75
Cotton for Strength, Mercerization of (Wilkie)................................................. 217
Cotton Piece Goods, bleaching (Chemical)................................................... 88
Cotton Printing, Some Color Shop Problems in (Easley)............................ 577
Cotton Stain Developments in the Application of Fast Colors on (Williams)........................................................................... 574
Cotton Structure, Theories of.................................................................... 299
Deterioration of Cotton by Enzymes (Mann)................................................. 559
Delustering of Silk Hosiery (Zisman)............................................................ 263
Dyeing of Wool, Fastness to Washing (Welsh)............................................. 275
Dyeing Affinity, The Methods of Manufacturing Rayon—Factors Affecting (Sedgley)..........................................................113
Dyeing Affinity, The Methods of Manufacturing Rayon—Factors Affecting (Sedgley)..........................................................113
Dyeing Agents, Modern Ideas on the Quantitative Description, of (Brazier)................................................................... 303
Dyeing and Finishing of Chenille Yarns, The (Leonard)............................ 417
Dyeing and Finishing—1, Rayon (Hathborne).............................................. 169
Dyeing assistants, great possibilities in modern washing (Hathorne)..... 430
Dyeing and Processing of Knit Goods, The (Christian).............................. 693
Dyeing, Historical Survey of Dyestuffs and (Bond)...................................... 210
Dyeing Industry, Glimpses into the Past of the (Currie)......................... 201
Dyeing of Wool Mixed Fabrics, The (Stott).................................................. 201
Dyeing Properties of Direct Cotton Colors, Some Observations on the Quantitative Description of the (Neale)............................344
Dyeing, The Application of Spectrophotometric Color Analysis to (Pine).............................................................................. 470
Dyeing with Pine (Pine)................................................................................ 470
Dye Kettle Construction as Related to the Economic Production of true Shades, The Materials for (Burke).................................. 351
Dye Mixtures by the Use of Immiscible Solvents, Analysis of (Matheson).............................................................................. 21
Dye Mordants, Identifying Basic................................................................ 721
Dye as a Chemical Pioneer, The (Shaw)....................................................... 430
Dyer and the Final Hardie, The (Atkinson)................................................... 734
Dyer’s Responsibility, The (Atkinson)........................................................ 85
Dyeing and Cellulose from the viewpoint of substantivity, Modern Ideas Concerning the Direct (Neale and Griffiths)............ 651
Dyes in Fast Color Production, The Development of the Standard (Neale).............................................................................. 651
Dyes on Piece Goods, The Production of Vat (Nelson)............................... 559
Dyeing in Latin America, Cultivating our (Marks)........................................ 685
Dyestuffs, Recent Advances in the Physical Chemistry of (Neale)........... 237
Dyestuffs when Applied to Cotton and Rayon, Rate of Absorption and shrinkage in (Smith).................................................. 381
Affinity at Different Temperatures of Substantive (Seibert)................. 757
Dyeing in Latin America, Cultivating our (Marks)........................................ 685

Index to Proceedings of American Association of Textile Chemists and Colorists

Absorption and Affinity at Different Temperatures of Substantive Dyestuffs when Applied to Cotton and Rayon. Rate of (Seibert)........ 383
Affinity at Different Temperatures of Substantive Dyestuffs when Applied to Cotton and Rayon. Rate of Absorption and (Seibert)....... 383
Aging Test for Waterproofed Duck and Similar Fabrics, An Accelerated........ 78
Alcohol Products, Sulphonated (Lenger).................. 345
Alcohol Sulphates, Recent Developments in the Application of the Fat

Analysis to Dyeing, The Application of Spectrophotometric Color

Applications for Membership........................................... 256

AMERICAN DYESTUFF REPORTER

SIXTH ANNUAL MEETING, Saturday Morning Session...

December 18, 1933
THE AMERICAN DYESTUFF REPORTER WILL APPEAR ON THE FOLLOWING DATES •

JANUARY . . . 1-15-29
FEBRUARY . . . 12-26
MARCH . . . . 12-26
APRIL . . . . . 9-23
MAY . . . . . . 7-21
JUNE . . . . . . 4-18
JULY . . . . . . 2-16-30
AUGUST . . . . 13-27
SEPTEMBER . . 10-24
OCTOBER . . . . 8-22
NOVEMBER . . 5-19
DECEMBER . . . 3-17-31

EVERY OTHER MONDAY

Proceedings of the AATC&C
