

Table of Contents

1 Thermodynamics and Kinetic Investigations on the Interactions between Malachite Green and Cetyltrimethylammonium Bromide

By Yiwen Zeng, Hezhou University; Juan Guo, Lanzhou Jiaotong University; Xingquan Wang, Qinghai Geermu Quality Supervision and Examination Center; and Nong Wang, Lanzhou Jiaotong University

Key Terms

Association Constant, Cetyltrimethylammonium Bromide, Malachite Green, Microemulsions

DOI: 10.14504/ajr.5.6.1

8 Pilling Performance Improvements of Fabrics made with Bamboo Rayon and Bamboo Rayon/Cotton Blends

By Farhana Naeem, Fareha Asim, and Muhammad Tufail, NED University of Engineering and Technology

Key Terms

Bamboo, Binder, Biopolishing, Cotton, Pilling, Rayon, Sanforizing, Singeing

DOI: 10.14504/ajr.5.6.2

17 Methoxy and Hydroxy Triphenylamine-Based Azo Dyes: Synthesis and Photophysical Properties on Polyester and Nylon Fabrics

By Archana Bhagwat, Shantaram Kothavale, Suvudha Shinde, and Sekar Nagaiyan Nethi, Institute of Chemical Technology

Key Terms

Azo Dyes, Dyeing, Electrophilicity Index, Exhaustion, Fixation, Lightfastness, Sublimation Fastness, Triphenylamine

DOI: 10.14504/ajr.5.6.3

27 Production of Natural Bamboo Fibers-3: SEM and EDX Analyses of Structures and Properties

By Bahrum Prang Rocky and Amanda J. Thompson, The University of Alabama

Key Terms

Bamboo Fiber Production, Bamboo Fiber Structure, Eco-friendly Fibers, EDX, SEM

DOI: 10.14504/ajr.5.6.4
