Call for PAPERS Sustainability Special Issue in AATCC Journal

RESEARCH TRIANGLE PARK, N.C., USA, March 18, 2019—The environmental impact of textile and apparel production is a critically important topic in the industry. Although much work has been completed to reduce this impact, many researchers, organizations, and companies are using newly-developed materials and innovative processes to address this. This Special Issue of the [AATCC Journal of Research](#) aims to enhance the understanding of alternative methods effective in reducing the environmental impact of textile and apparel production and processing throughout the supply chain. All articles will be peer reviewed. Suggested topics include, but are not limited to:

- Advances in sustainable production processes
- Green Chemistry in textile production and processes
- Emerging sustainable materials
- Closed loop manufacturing
- Sustainable colorants and finishing agents
- Microfiber pollution and release
- Life Cycle Assessment of textile materials, products, and processes

This issue is guest edited by Karen K. Leonas from North Carolina State University Wilson College of Textiles.

Manuscripts must be submitted to the Editor at kleonas@ncsu.edu by May 31, 2019. Formatting and submission guidelines can be found at <https://www.aatcc.org/pub/aatcc-journal/submissionguidelines/>.
