

# New Product Announcement

## GTI Expands Highly Popular MiniMatcher Series

*The New GTI MiniMatcher® 2436e Meets the Market's Requirement for an Affordable, Easy to Use Mid-size Multi-source Desktop Color Matching System.*

The new GTI MiniMatcher 2436e has a viewing area of 22.75" high x 36" wide x 23" deep. It includes five light sources that can be configured to meet your requirements:

- Daylight (D65, D75, or D50)
- Store light (Cool White Fluorescent or TL84)
- Home light (Incandescent A)
- Ultraviolet (UVA BLB)
- Optional source (LED, D50, D75, Horizon, TL84, or TL83)

The MiniMatcher 2436e features an illuminated push button control that confirms which source is selected. A daylight source timer is standard. GTI's ColorGuard II lamp tracking is available as an option. ColorGuard is a monitoring system that tracks usage for each light source and notifies you when it is time to relamp.

To assist with metamerism testing, the MM-2436e provides one touch automatic light source sequencing. This feature allows the user to program a set of light sources that will automatically sequence for a fixed period of time. For highly critical applications, an optional prismatic diffusion lens is offered.

Optional viewing stands are available. They are designed to support flat samples at a 45 degree viewing angle (VS models) or at variable angles (VVT models).

### Pricing and Availability

GTI is now accepting orders for the MM-2436e. Pricing is:

<u>Model</u>	<u>List Price (USD)</u>
MM-2436e .....	\$2,895.00
ColorGuard Upgrade .....	\$350.00
Prismatic Diffusion Lens Option .....	\$150.00

*The new MM-2436e is a similar size and an ideal replacement booth for SpectraLight viewing booths.*

*Light sources are controlled by an illuminated push button control.*

*GTI ColorMatcher 6500K lamps deliver the tightest match to the industry standard D65 curve.*

*Optional 45 degree and variable angle viewing tables are available.*

*Optional ColorGuard tracks usage for each light source.*
