

# Table of Contents

- 1 Examination of Fabric Chemical Treatment Uniformity using a Mid-IR Focal Plane Array Detector**  
By Michael Santiago Cintron, Terri Von Hoven, Krystal Fontenot, Rebecca Hron, and Doug J. Hinchliffe, USDA-ARS-SRRC  
**Key Terms**  
Chemical Finishing, Cotton, DEET, Flame Retardant, FTIR, Imaging, Mid-IR FPA  
**DOI:** 10.14504/ajr.6.3.1
- 8 Stability and Antibacterial Assessment of Copper Nanoparticles Dispersed on Cotton Fabrics**  
By Krystal R. Fontenot, Sunghyun Nam, Alfred D. French, and Brian D. Condon, USDA-ARS-SRRC  
**Key Terms**  
Antibacterial Wipes, Copper Nanoparticles, Copper Nanoparticle Fabrics, Cotton, Stability  
**DOI:** 10.14504/ajr.6.3.2
- 20 Dye-Surfactant Solution of Coomassie Brilliant Blue G250 and Tween 20: Micellar and Interaction Parametric Studies**  
By Zhaoran Wang, Jilei Jing, Dailian Wang, Junfeng Tong, and Nong Wang, Lanzhou Jiaotong University  
**Key Terms**  
Coomassie Brilliant Blue, Critical Micelle Concentration, Electrical Conductivity, Fluorescence  
**DOI:** 10.14504/ajr.6.3.3
- 28 Fabrication and Characterization of Diatomite Functionalized Cellulose Acetate Nanofibers**  
By Çiğdem Akduman, Pamukkale University  
**Key Terms**  
Cellulose Acetate, Diatomite, Electrospinning, Membranes, Nanofibers, Wastewater Treatment  
**DOI:** 10.14504/ajr.6.3.4
