AATCC Individual Members have voting rights in AATCC test method development committees and may nominate and elect AATCC leadership.

As a member of an AATCC committee, you enhance your reputation as an expert and influencer in your field. Share opinions and expertise at bi-annual meetings and vote on committee ballots as a member.
In addition to test method committees, there are committee meetings for Interest Groups to help you connect with like-minded professionals. These groups feature in the governance of the Association, and their officers serve on the AATCC Board of Directors.

- **Chemical Applications**: Forum for those interested in the application of chemicals (preparation aids, colorants, finishes, polymers, etc.) to textile substrates.
- **Concept 2 Consumer**: Forum for textile, apparel, and home fashions brands and manufacturers. Members discuss issues surrounding the creation of product, from initial concept to final consumption.
- **Materials**: Forum for those interested in new materials related to the fiber industries via innovative modifications of existing structures and creation of unique compositions of matter.
- **Rising Professionals (RISE)**: Forum for individuals new to the industry or new to AATCC. Members discuss the challenges of a career in textiles. Topics include AATCC resources, policies, and procedures; the group also tackles the broader topics of leadership, mentorship, inclusiveness, and diversity.

All members are invited to give a presentation or volunteer to serve as Secretary of these Interest Groups, or to run for the position of IG Chair.

Meetings are held both virtually online and in person in Research Triangle Park, NC, in the Spring and Fall.
30% Discount for Members

The *Technical Manual* includes all the current test methods, evaluation procedures, and monographs published by AATCC. It also includes supplemental information such as research committee rosters and reports, a glossary, and standard procedures.

AATCC Membership also provides a 30% member discount to ASTM Compass, an online database of ASTM standards and AATCC test methods.
REGISTRATION DISCOUNTS FOR WORKSHOPS AND CONFERENCES

- **Interactive workshops** offer hands-on experience with limited class sizes to allow personal attention and questions.

- **Specialized conferences** bring together leading industry and academic experts.

- **Custom on-site trainings** connect AATCC experts directly with your team! Host a Test Method Training workshop at your facility, with a specially-designed curriculum.
ONLINE TRAINING

- Membership gives you access to a variety of digital trainings, both live and archived, at a member discount. Members may demonstrate thought-leadership on a topic of their expertise by hosting presentations, workshops, or participating in discussions via interviews and panels.

- Demonstrations of test methods are now available with the Test Method Training course. Learn how to conduct test methods and procedures in Color Vision & Evaluation; Colorfastness; Laundering; and Repellency & Resistance. You can view the recorded modules straight through or in segments.

- Members can also access more in-depth online training with Textile Fundamentals—“eLearning” instruction for all sectors of the textile supply chain.
AATCC Review is the official publication of AATCC, bringing to light innovative research on all facets of fibers, textiles, and apparel, six times a year. Topics include design, processing, testing, and materials.

Feature articles unravel challenges in sustainability, durability and performance, earning attention from renowned global competitions including the Tabbies (Trade, Association and Business Publications International) and the APEX Awards (Communication Concepts).

Available in print, in pdf digital format, and as an online publication.

AATCC announcements, news, and events.
The Association’s online-only peer-reviewed journal, covering advanced materials, fibers, textile and polymer chemistry, color science, apparel design, sustainability, and much more.

✓ Individual attention for authors
✓ Well-known and respected editorial team
Search for publications from the scientific community, as well as innovative industry:

- Every article published in the *AATCC Review* since 1969
- Indexes and abstracts for more than 490 periodical titles, and for over 882,000 records drawn from sources such as books, conferences, theses, technical reports, and trade literature from around the world.
- Includes full text for nearly 75 journals, as well as over 50 books and monographs.

To access the full searchable database online, log in with your credentials and search the Article Archive.
AATCC’s primary newsletter, *AATCC News*, continues to serve as a trusted source of what’s ahead in textile evaluation and product development.

AATCC Corporate Members are invited to contribute short, educational articles to demonstrate thought-leadership on topics of interest to the industry.
As a member, you can search the full AATCC network of textile professionals across the supply chain, from researchers to manufacturers to designers. These are all searchable in the AATCC Member Directory.

- Find potential suppliers, business partners, customers, vendors, employers, or consultants.

- Searchable by name, job function, company, or location. Within job function, you can enter fields such as consulting, product development, sustainability, or testing.

AATCC never sells our membership database to outside firms; only members have access.
Also included with AATCC membership is a guide to Selecting a Testing Lab.

For a specific list of commercial textile testing labs, available to AATCC members only, login to AATCC Members Technical page. Under “Testing Resources” navigate to “Textile Testing Labs”. This list, which includes the type of testing a lab completes, is compiled of labs that participate in the Proficiency Testing Program and have elected to be included in this resource. Please note that AATCC does not endorse these or any other labs.

For further assistance in finding a testing lab, consider using the AATCC Buyers Guide which lists resources, including testing services.
